How to Use This Chart

This chart describes the route to human recovery and ultimate expansion of one's ability and power as a spiritual being. The field of human recovery belongs to Dianetics technology, Scientology philosophy brings an individual to higher states of being and ability. The chart could be conceived as a map of the expansion of life. It shows at each level the realization of a greater potential with, at the left under *Training*, a new knowledge and skill in handling life, in the center of the chart under *Awareness Characteristics*, an expanded awareness, and at the right under *Processing*, the attainment of a higher state of beingness.

1. In your first reading of the chart you will probably have scanned it over in a general way and become familiar with many parts of it. Be sure, next, to read across the top of the columns to learn what each level describes. You'll see that there are three main areas, *Training*, *Awareness Characteristics* and *Processing*, and all three progress upwards in increasing levels on the chart. Just as each level up to Clear requires an auditor with an added field of knowledge and skill, at each level we find also a preclear ready to be run on the level, having attained all the grades below.

2. Now look at the various introductory level services at the bottom of the chart under *Dianetics and Scientology Introductory Services*. Note that these introductory level services and activities are not mandatory, but are there to help one begin and become familiar with the fundamentals. One may take any of these routes he chooses—the Registrar at your nearest Church of Scientology can assist you in selecting the one best suited to your needs and interests.

3. Read across each complete level of the chart, only moving up a level when you have satisfied your own understanding of each level as described. You will thereby gain a thorough grasp of the direction and magnitude of Dianetics technology and Scientology philosophy. At the band of Clear the column headings are doubled for each level so the headings correspond to the upper and lower boxes in each row.

4. The optimum route up this chart is to train as an auditor and co-audit with another up the processing side of the chart. Through training you gain a complete understanding of the mind and life and thus your gains from auditing are greater. Following completion of the Purification Rundown, co-auditing can be done up through NED Case Completion or the state of Clear in all Academies of Scientology organizations.

5. On the far left and far right of the chart, you will find described various services (training services on the left-hand side, processing on the right) that can be done at several different points on one's way up The Bridge. For more information on these, see the Registrar at your nearest Church of Scientology.

6. Read the books of Dianetics technology and Scientology philosophy, available from every Church of Scientology or your local bookstores for continued expansion of your knowledge and use of the subjects.

7. In your study of this chart (and in any studies) be sure you do not go past words you do not understand. Use a good dictionary. There is also a *Scientology Dictionary* available from your Church of Scientology.

With this chart in front of you, you have already made the most important step of all—you have contacted truth and the route to freedom. It is hard for man in his present condition to grasp even that higher states of being exist. He had no literature about them, really, or any vocabulary for them. In all of philosophy he had no glimmering at all of Dianetics technology and only a distant hope for spiritual freedom as in Scientology philosophy, but no technology at all.

Factually you've been travelling this universe a very long time without a map. Now you've got one. Put this chart on your wall. When you've taken some of the steps, mark them DONE with the date. Find out your next step and mark it TO BE DONE and WHEN. Then do it. There's plenty of expert help in the Churches and Missions of Scientology; don't hesitate to use it.

Keep track of your progress and keep moving. You'll make it. All the way.

Definitions

AUDITOR: a person trained and qualified in applying Dianetics and/or Scientology processes and procedures to individuals for their betterment; called an auditor because auditor means one who listens.

CLEAR: the name of a state achieved through auditing or an individual who has achieved this state. A Clear is a being who no longer has his own reactive mind. A Clear is an unalterned person and is rational in that he forms the best possible solutions he can on the data he has and from his viewpoint. The Clear has no engrams which can be restimulated to throw out the correctness of computation by entering hidden and false data.

DIANETICS: Dianetics spiritual healing technology. It addresses and handles the effects of the spirit on the body and can alleviate such things as unwanted sensations and emotions, injuries and psychosomatic illnesses (ones that are caused or aggravated by mental stress). Dianetics means "through the soul" (from Greek *dia*, "through" and *nous*, "soul"). It is further defined as "what the soul is doing to the body."

OT: a being who is knowing and willing cause over life, thought, matter, energy, space and time. For thousands of years men have sought the state of complete spiritual freedom from the endless cycle of birth and death and have sought personal immortality containing full awareness, memory and ability as a spirit independent of the flesh. In Scientology this state has been attained. We call this state "Operating Thetan." To operate something is to be able to handle it. *Thetan* is from the Greek letter "theta" the traditional philosopher's symbol (from the letter in the Greek alphabet "theta" is) of thought, spirit or life. Thus it means a being who as a spirit alone can handle things.

PRECLEAR: a person who is on the road to becoming Clear, hence pre-Clear. A Clear is a being who, through Scientology and Dianetics processing, is able to form the best possible solutions he can on the data he has and from his viewpoint.

RELEASE: the term for what occurs when a person separates from his reactive mind or some part of it. The degree and relative permanence of being pulled out of the reactive mind determines the state of Release. There are a number of states or stages of Release and these are called Grades.

SCIENTOLOGY: Scientology philosophy. It is the study and handling of the spirit in relationship to itself, universes and other life. *Scientology* means *to know, knowing in the fullest sense of the word* and *logos*, "study." In itself the word means *literally knowing how to know*. Scientology is a "route," a way, rather than a dissertation or an assertive body of knowledge. Through its drills and studies one may find the truth for himself. The *technology* is therefore not expounded as something to believe, but something to do.

THETAN: the person himself—not his body or his name, the physical universe, his mind or anything else, that which is aware of being aware; the identity which is the individual. The term was coined to eliminate any possible confusion with older, invalid concepts. It comes from the Greek letter "theta" (θ) to which an *n* is added to make a noun in the modern style used to create words in engineering. It is also Φ, or "theta to the nth degree," meaning unlimited or vast.

TRs: training regimens or routines, often referred to as training drills. TRs are practical drills on the cycle of communication.
